AT BODY MASTERS
SPORTS CLUB

Building: Body Masters
Sports Club

Location: Kingdom of
Saudi Arabia, Riyadh

Film: AIR80BLSRHPR

Type: Solar Control Film

Installation Size: 400 M²

CASE STUDY

Situation: One of the largest and newest sports clubs established by the Body Master Sports Club chain was facing serious problems with heat and glare from direct sunlight. The sun's rays were penetrating the glass facade and beating down on the fitness equipment inside the club causing the air conditioning to work at maximum capacity. Club members had a difficult time working out near the windows due to harsh glare.

Solution: The Body Master Sports Club general manager chose LLumar's new AIR Blue film to solve the problem. This spectrally selective film features 43% total solar energy rejection, 78% visible light transmission, and 99% ultraviolet rejection.

Results: After the installation, Mr. Mansour Al-Shoabi, Manager, Body Master Sports Club Projects Department, commented that the LLumar film improved the comfort of the facility for their customers. He said, "The film creates a pleasing environment inside the club. It provides protection for our equipment and offers significant energy savings. I am fully satisfied with the quality and performance of the LLumar film we selected."
