

LLUMAR  
DESIGNER FILM  
LETS YOU  
DREAM IN  
COLOR.

IF GLASS  
IS YOUR  
CANVAS,  
LLUMAR  
IS YOUR  
PALETTE.

Bold color and unique design enliven a glass-enclosed footbridge at the Galerias Monterrey mall in Monterrey, Mexico. LLumar's extensive product line gave mall managers endless design options with the color stability to endure the harsh sunlight of northern Mexico.

You spend your days creating form and function out of material and space. Add a new dimension of color and pattern to your design toolkit with LLumar Designer Window Film.

Available in a rainbow of hues and patterns, LLumar gives you unlimited options for bringing light and space to life. Apply color, texture or opacity to virtually any glass or metal surface, including paned or cylindrical surfaces. Add the elegant look of etched glass at a fraction of the cost. LLumar is easily applied and removed, making it ideal for commercial properties and leased spaces where tenant turnover can require frequent updates to signage or layout.

Change your view without changing your location.

More than windows and walls, LLumar can refresh the look of all kinds of surfaces. Here, it is used to give glass tables a frosted finish at Brazil's Casa Cor architecture show.

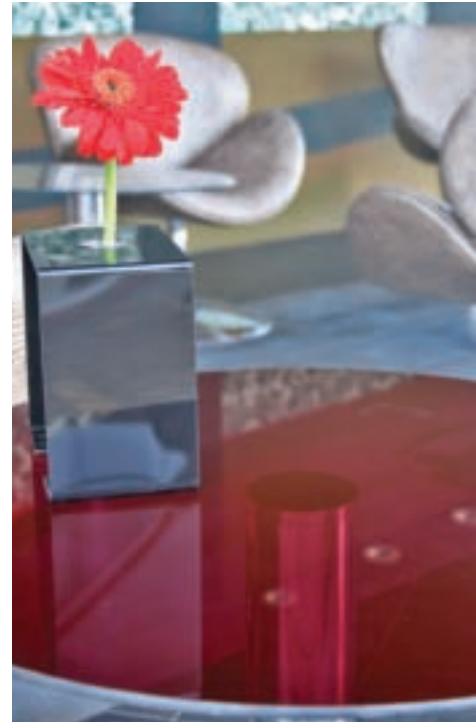

### Choose the world's best selling brand of window film.

LLumar offers endless possibilities for bringing new life to existing properties. Choose from an array of vibrant colors, patterns and textures, including:

- Colors: Red, yellow, green, blue, bronze, white, black, silver, and frost
- Patterns: Squares, dots, stripes, and bands
- Finishes: Matte, translucent, opaque, and textured

Combine colors to create virtually any hue. Overlap patterns to create a signature look. Select a finish to diffuse or focus light, or even block it entirely. No matter what your design challenge, LLumar can deliver an affordable, practical and unique solution with stunning results.

### **Make each project a one-of-a-kind.**

LLumar films can be custom cut with business logos or other unique designs. Using LLumar PrecisionCut™ technology, your LLumar installer can create crisp pre-cut patterns from your artwork, simplifying installation and saving time, money, and onsite disruptions. As business grows or tastes change, film can be easily replaced to give the space a fresh look.

Maintain that one-of-a-kind look across multiple locations. For companies with several offices or outlets, LLumar offers an easy way to create a uniform look and branding from one location to the next, without the disruption and expense of remodeling.

LLumar is virtually maintenance free. And unlike traditional etched glass, LLumar-treated surfaces resist fingerprints. Simply clean treated windows as you would any other.

To complement Lino Villaventura's audacious fashions, architect Leo Shehtman selected LLumar black matte film for the store facade.

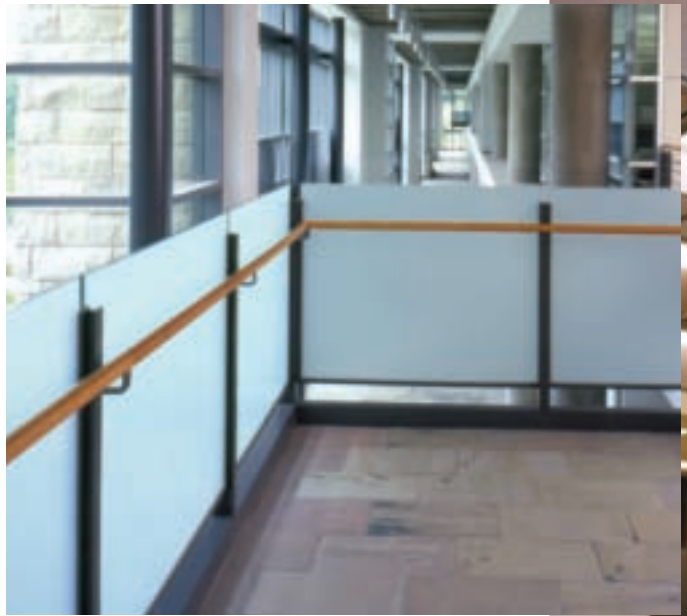

Originally developed to block light, LLumar black matte film allows designers to achieve the sleek, elegant look of black marble at a fraction of the cost.

### **Discover the beauty of privacy.**

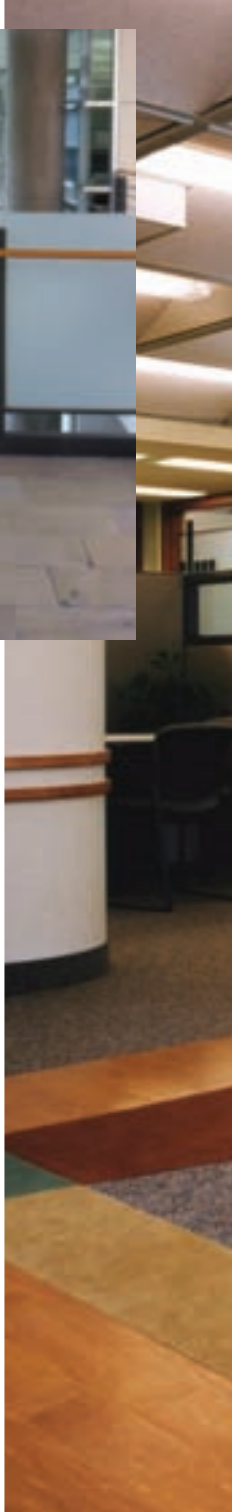

Discourage visual intrusion while enhancing design and reducing glare. LLumar offers a variety of privacy solutions to suit any project. Frosted and translucent finishes let you enjoy privacy without sacrificing natural light, and solid colors and patterns shield private spaces while making a bold design statement. Or combine treatments for a custom solution. With so many options, LLumar lets you strike the perfect balance between function and style, making it ideal for almost any application. From residential to commercial, retail to hospitality, the possibilities are endless.

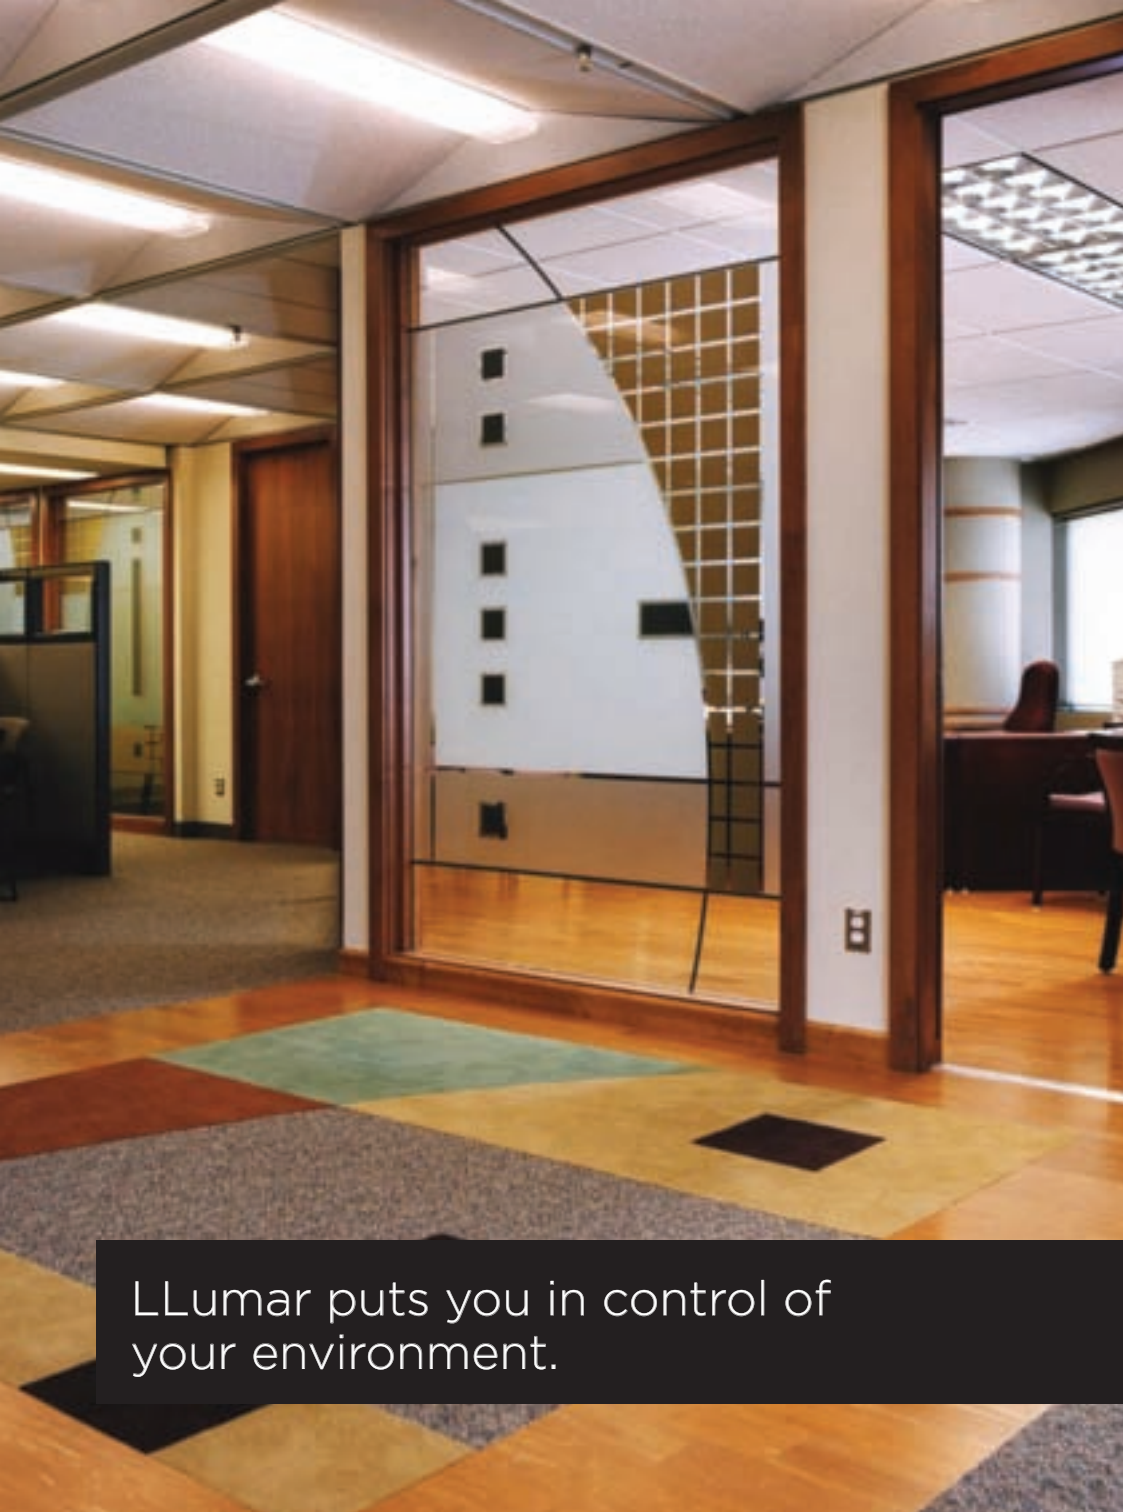

You can block the view, or you can make a statement.

With LLumar, your only limit is your imagination. Here, the designer combines frosted, bronze, black, and patterned films to create a unique look that enhances privacy as well as design.

LLumar puts you in control of your environment.

### **Trust LLumar.**

LLumar Designer Films have been enhancing some of the world's most prominent buildings for decades. Manufactured by ISO-9001 certified CPFilms, LLumar is available in a variety of widths to offer unprecedented design flexibility and seamless application. Conducted by our global network of authorized dealers, installation is fast with minimal disruption to tenants or contractors. And it is backed by a manufacturer's warranty.
